

INNOVATIVE WATER SOLUTIONS | MADE IN BERLIN

LAR Process Analysers AG is a worldwide leading manufacturer for online measurement technology for the determination of sum parameters in water samples. In addition to municipal facilities, our customer base consists of German and International industrial companies.

For more than 30 years, we develop and produce in our German headquarter innovative measuring technology, with support of our sales office, a subsidiary in Pudong, Shanghai and linked to a worldwide acting distribution network.

Close customer contact and our strong after sales performance are the base for our success. Keeping the technology lead in the market is our guarantee for participating on the future water market.

Our Shanghai office in Pudong is still growing with a casual company culture and an open minded international and highly committed team.
